A BEAUTIFUL CITY REPORTING

A Beautiful City Reporting ABC is strictly a software size metric, although it has often been misconstrued as a complexity metric. Size is computed by counting the number of assignments, branches and conditions for a section of code. The ABC software metric was introduced by Jerry Fitzpatrick in 1997 to overcome the drawbacks of the LOC. The metric defines an ABC score as a triplet of values that represent the size of a set of source code statements. ABC Metric. Calculates the ABC Metric for a class or method.ABC is a metric of size/complexity that counts the number of Assignments (A), Branches (B) and Conditions (C) and assigns a single numerical score calculated as: ABC metric = 50, corresponding to the statements we have created. LOC = 55, corresponding to the 50 assignments and some few lines to declare the class and an unique method. Complexity = 1, as there is absolutely no complexity. The ABC metric was developed to overcome the disadvantages of LOC and token-counting techniques. However, since it is a code metric it supplements, rather than replaces, measures such Metric ABC ===== This little tool calculates ABC metric for your Ruby code. The difference between any class of gage is not the wear or life span of the gage, it's the tolerance which is allowed in the manufacturing process of the gage. ABCya is the leader in free educational computer games and mobile apps for kids. The innovation of a grade school teacher, ABCya is an award-winning destination for elementary students that offers hundreds of fun, engaging learning activities. Millions of kids, parents, and teachers visit ABCya.com. The ABC metric is a neat measurement because it let's you sum up a lot of information in a way that is very easily understood. Since this information is easily understood, it's easy to use it. I need to amend my previous statement about the edits made by 108.160.195.141. For some reason, I was temporarily confused about the B and C components of the ABC metric. 100 ft long x 10 ft wide x 3? deep x ABC (140 lbs/ft3) 100' x 10' x 3"/12" x 140 lbs/2000 lbs = 17.5 Tons We have tandem, tri-axle, and quad-axle dump trucks available
