## DESCRIPTION OF THE BOOK CERAMICS

"It is rare to find a book on art that presents complex aesthetic principles in clear readable form. Ceramics, by Philip Rawson, is such a book. I discovered it ten years ago, and today my well-worn copy has scarcely a page on which some statement is not underlined and starred."-Wayne Higby, from the Foreword

## CERAMIC - WIKIPEDIA

A ceramic material is an inorganic, non-metallic, often crystalline oxide, nitride or carbide material. Some elements, such as carbon or silicon, may be considered ceramics. Ceramics are classified as inorganic and nonmetallic materials that are essential to our daily lifestyle. Ceramic and materials engineers are the people who design the processes in which these products can be made, create new types of ceramic products, and find different uses for ceramic products in everyday life.
