DESCRIPTION OF THE BOOK DISCOVERING NATURE WITH YOUNG CHILDREN TEACHER'S GUIDE

Rather than focusing on learning facts without direct experience or observing random objects on a table, Discovering Nature makes science the exploration of materials and phenomena. It then gives children opportunities to learn from that experience

The first in a new series, Discovering Nature with Young Children explores the wide-ranging elements that make up the natural world around us. The curriculum replaces simple fact-feeding practices with the development of long-term scientific reasoning, including literacy skills and numeracy skills, such as hypothesis, inference, prediction, and. There are plenty of specific ideas, such as showing children how to observe nature, setting up a terrarium, or growing plants. But the book, part of the Young Scientist series, also makes a strong pitch for good scientific education for young children, emphasizing the advantages and value of hands-on experiences. Discovering Nature with Young Children: Trainer's: Part of the Young Scientist Series by Ingrid Chalufour, Karen Worth Field-tested across the country, this comprehensive curriculum expands and extends the role science has traditionally played in the early childhood classroom. With children's access to the outdoors and the natural world becoming increasingly limited or nonexistent, child care, kindergarten and schools, where children spend 40 to 50 hours per week, may be mankind's last opportunity to reconnect children with the natural world and create a future generation that values and preserves nature.

DISCOVERING NATURE WITH YOUNG CHILDREN TRAINER'S GUIDE

How best to teach young children—pupils in preschool, kindergarten, and the early grades—has long been a subject of lively debate. Over the past decade, however, a consensus has arisen among experts in early childhood education, most of whom endorse the idea of "developmentally appropriate practice." The content of science for young children is a sophisticated interplay among concepts, scientific reasoning, the nature of science, and doing science. It is not primarily a science of information. While facts are important, children need to begin to build an understanding of basic concepts and how they connect and apply to the world in which. The first in a new series, Discovering Nature with Young Children explores the wide-ranging elements that make up the natural world around us. The curriculum replaces simple fact-feeding practices with the development of long-term scientific reasoning, including literacy skills and numeracy skills, such as hypothesis, inference, prediction, and.
