## DESCRIPTION OF THE BOOK HELLO! HTMLS & CSS3

HTML and CSS are the foundation of the web, and HTML5 and CSS3 are the latest standards. Anyone who builds web pages, mobile apps, or does any type of development at all, must master these languages. Hello! HTML5 and CSS3 is written for the web designer or developer who wants a fast, example-oriented introduction to the new HTML and CSS features. After a quick review of the basics, the book moves quickly into building real pages in HTML5. Learn how to seamlessly integrate audio and video with HTML5, then add some style with new CSS3 features such as drop shadows, borders, colors, gradients and backgrounds. Discover how to target specific devices with media queries, and do all of it with less code. Finally, walk through several large examples that demonstrate how HTML5 and CSS3 working together can produce responsive and lightweight applications.

ABOUT THE TECHNOLOGY HTML and CSS are computer languages to build web pages. The W3C publishes internationally recognized standards for HTML and CSS that web developers are expected to follow. The next versions to be released are HTML5 and CSS3. Many of their exciting new features have already been implemented in leading web browsers and the industry buzz is growing apace.

Styling and layout on AMP HTML pages is very similar to normal HTML pages - in both cases, you'll use CSS. However, AMP limits some use of CSS for performance and usability reasons, while expanding responsive design capabilities with features like placeholders & fallbacks, advanced art direction via srcset and the layout attribute for better control over how your elements display. The result is that the same web page, if well structured, can easily be read on a desktop computer, a mobile phone, and a text-to-speech converter. Compare this to a document format like PDF, where the layout and content are Hello! HTML5 & CSS3 is a smart, snappy, and fun way to get started now.
