DESCRIPTION OF THE BOOK HIDDEN UNIVERSE

Our eyes are the result of an evolutionary adaptation to the sun's light. Since the sun is a G dwarf and emits most of its light in only a small part of the electromagnetic spectrum, our eyes are very limited in their capability to show us the universe. This book shows the fundamental change in our perception by covering the full spectrum of light. The authors' unique skill in both science and science communication allows for a popular writing style, with an emphasis on what cannot be seen with our eyes. They make many comparisons with high-color images to reveal what is actually taking place behind the veil. They also make good use of their access to the most striking images in the field, creating full-color illustrations as needed. In addition, boxes and diagrams provide overviews of the instruments used.

HIDDEN UNIVERSE | NOW PLAYING AT SELECT IMAX®, IMAX 3D AND

Home - Video Enter Site Hidden Universe Mystery Even little children have control of some things, some of them have power over their friends, some over their parents or the tasks at school.
