## DESCRIPTION OF THE BOOK MAKING SCALE MODELS

Making Small Scale Models is for those who have never made a model before or want to develop or increase their skills. From cutting a straight line to making a scaled human figure that 'lives', through to creating beautifully detailed buildings and finely detailed furniture, the book takes you through each stage of the process. Topics covered include: Methods for a wide range of disciplines, from theatre design to railway modelling to interior design; Practical guide to tools and materials; Basic techniques for constructing scale models using simple, readily available materials; Step-by-step guides to projects designed to practise and develop skills; Advanced ideas focus on colour, texture and form to bring models to life.

## HOW TO MAKE A SCALE MODEL | EHOW

Scale models represent a re-creation of an object. However, scale models try to keep the relative length, width and height of each part of the model the same as on the original object. Making a scale model requires careful math, sculpting, drawing and building skills. The model should be planned out. Scale models are often built as a hobby, but engineers build scale models as part of the engineering design process when designing objects or structures. There are various ways to define the engineering design process, but all involve the following basic steps: Model Shop - Model Making - Super-Hobby.com - Modelling goods, scale models, plastic models, modelling tools, paints, literature, chemicals, and more.
