Hi, Blue Carrot Catering is one of Wellington's favourite catering companies! We have a passion for food, and provide a professional and friendly service. Red Carrots contain more lycopene than other varieties, and have a pinkish red to purplish red outside layer with a core of pink to orange. One cultivar, called Beta-Sweet, is a cross between a western and an eastern carrot. The carrot (*Daucus carota* subsp. *sativus*) is a root vegetable, usually orange in colour, though purple, black, red, white, and yellow cultivars exist. Carrots are a domesticated form of the wild carrot, *Daucus carota*, native to Europe and southwestern Asia. The hexadecimal RGB code of Carrot color is #ED9121. This code is composed of a hexadecimal ED red (237/256), a 91 green (145/256) and a 21 blue component (33/256). The decimal RGB color code is rgb(237,145,33). A red carrot is remarkable and rare. It catches your eye, makes you think, triggers action. It distinguishes itself from the ordinary orange bunch; it represents the power of persuasion, fueled by passion and backed by intelligence. So I reached in a pulled out of the container a monster of a carrot. I was so amazed at how large it had grown and it took me several minutes of pulling on it to actually get it out of the ground. It lasted me two meals to actually eat the whole carrot and it was super tasty, every bite a pure joy. Today I found out, before the 17th century, almost all cultivated carrots were purple.. The modern day orange carrot wasn't cultivated until Dutch growers in the late 16th century took mutant strains of the purple carrot and gradually developed them into the sweet, plump, orange variety we have today. Most carrots were originally deep purple, almost black, with red and white varieties occasionally popping up. In fact, purple carrots were the dominating carrot variety until the 17th century when Dutch farmers developed the

modern day orange carrot by crossing various cultivated and wild carrots. Purple Carrot has allowed us to stay healthy while still giving us the opportunity to eat great tasting food." Thanks to @purplecarrotxo, it has been easy to incorporate plant-based meals into my diet. Try purple carrots, cauliflower, potatoes, kale, peppers, broccoli, beans, and asparagus just to name a few. Blue is also code for anthocyanins so pick up some blue carrots and get extra plant compounds with every bite! Orange appears to be passe in the carrot world, however, since scientists working for the U.S. Department of Agriculture (USDA) and other institutions have been exploring more colorful versions — think bright yellow, purple and red — to market. Blue Carrot, Jo Flowers and Sarah Raven Trio Workshop Come and join me, along with Susanne Hatwood of Blue Carrot and Jo Flowers, for this collaborative demonstration and workshop, where you will create your own bouquet or urn under their expert guidance. Atomic Red Carrot Seeds (*Daucus carota* var. *sativus*) grow red carrots with high lycopene and sweet, mild flavor peaked in cooked stage.
