### DESCRIPTION OF THE BOOK ROMANCE OF GEOLOGY

Do you know that -- the Great Pyramid is made of shellfish? The Grand Canyon has been dipped into the ocean three times? We are sinking at the rate of one foot every nine thousand years? The Mississippi delta will soon be as large as one of the smaller Balkan states? Camels once lived as natives in the United States? The Niagara River is new, the Rio Grande is a vagabond, and the Tennessee a pirate? Chalk is made chiefly of skeletons? "Romance of Geology" is one of Enos Mills' last books, published after his death in 1922. It is a great collection of stories of the lives of rivers, mountains, oceans and deserts, mirages and glaciers, for both the seasoned rock hound and the newly curious about the ways weather and elements have changed our world! Enos A. Mills is known as "The Father of Rocky Mountain National Park" and his many years of adventuring led to several books on the natural world and the fascinating stories he discovered in it. This edition has been published by the Enos Mills Cabin, owned and operated by descendants of Enos A. Mills. We have included letters and other memorabilia from our archives to make your experience with Enos' stories richer and more enjoyable. All purchases from the Enos Mills Cabin help keep his homestead museum and his works available to the public. We receive no financial help from government agencies. Thank you for your support!

Geoscientists typically work in one or more of several closely related fields, including geology, geophysics, and hydrology. Reflecting the complexity of the natural world in which they work, most modern geoscientists possess interdisciplinary skills and often work in teams with other geoscientists whose expertise complements their own.
