This in-depth guide covers every type of residential flooring: laminated, tile, wood, engineered wood, stone, rugs, carpet, garage-tile systems, and polished concrete. The use of stone in flooring continued to develop over time, and there is evidence that the Greeks were creating pebble mosaic floors as early as 3000 years ago. These were made by placing hundreds of small, rounded stones into a mortar bed to form an image.

- Install flooring parallel to the longest wall or focal point in the room.
- Measure

the width of the room from this wall and divide the distance by the width of the planks. This will tell you what the width of the final row of planks should be. This book, however, does go into huge detail about laying out mosaic type flooring and the pictures are just awesome. The only mention Peterson makes about laying out an odd-shaped room is on one page.
